We See . . . We Feel . . .

We Imagine . . .

The ultimate purpose of rehabilitation nursing is….?

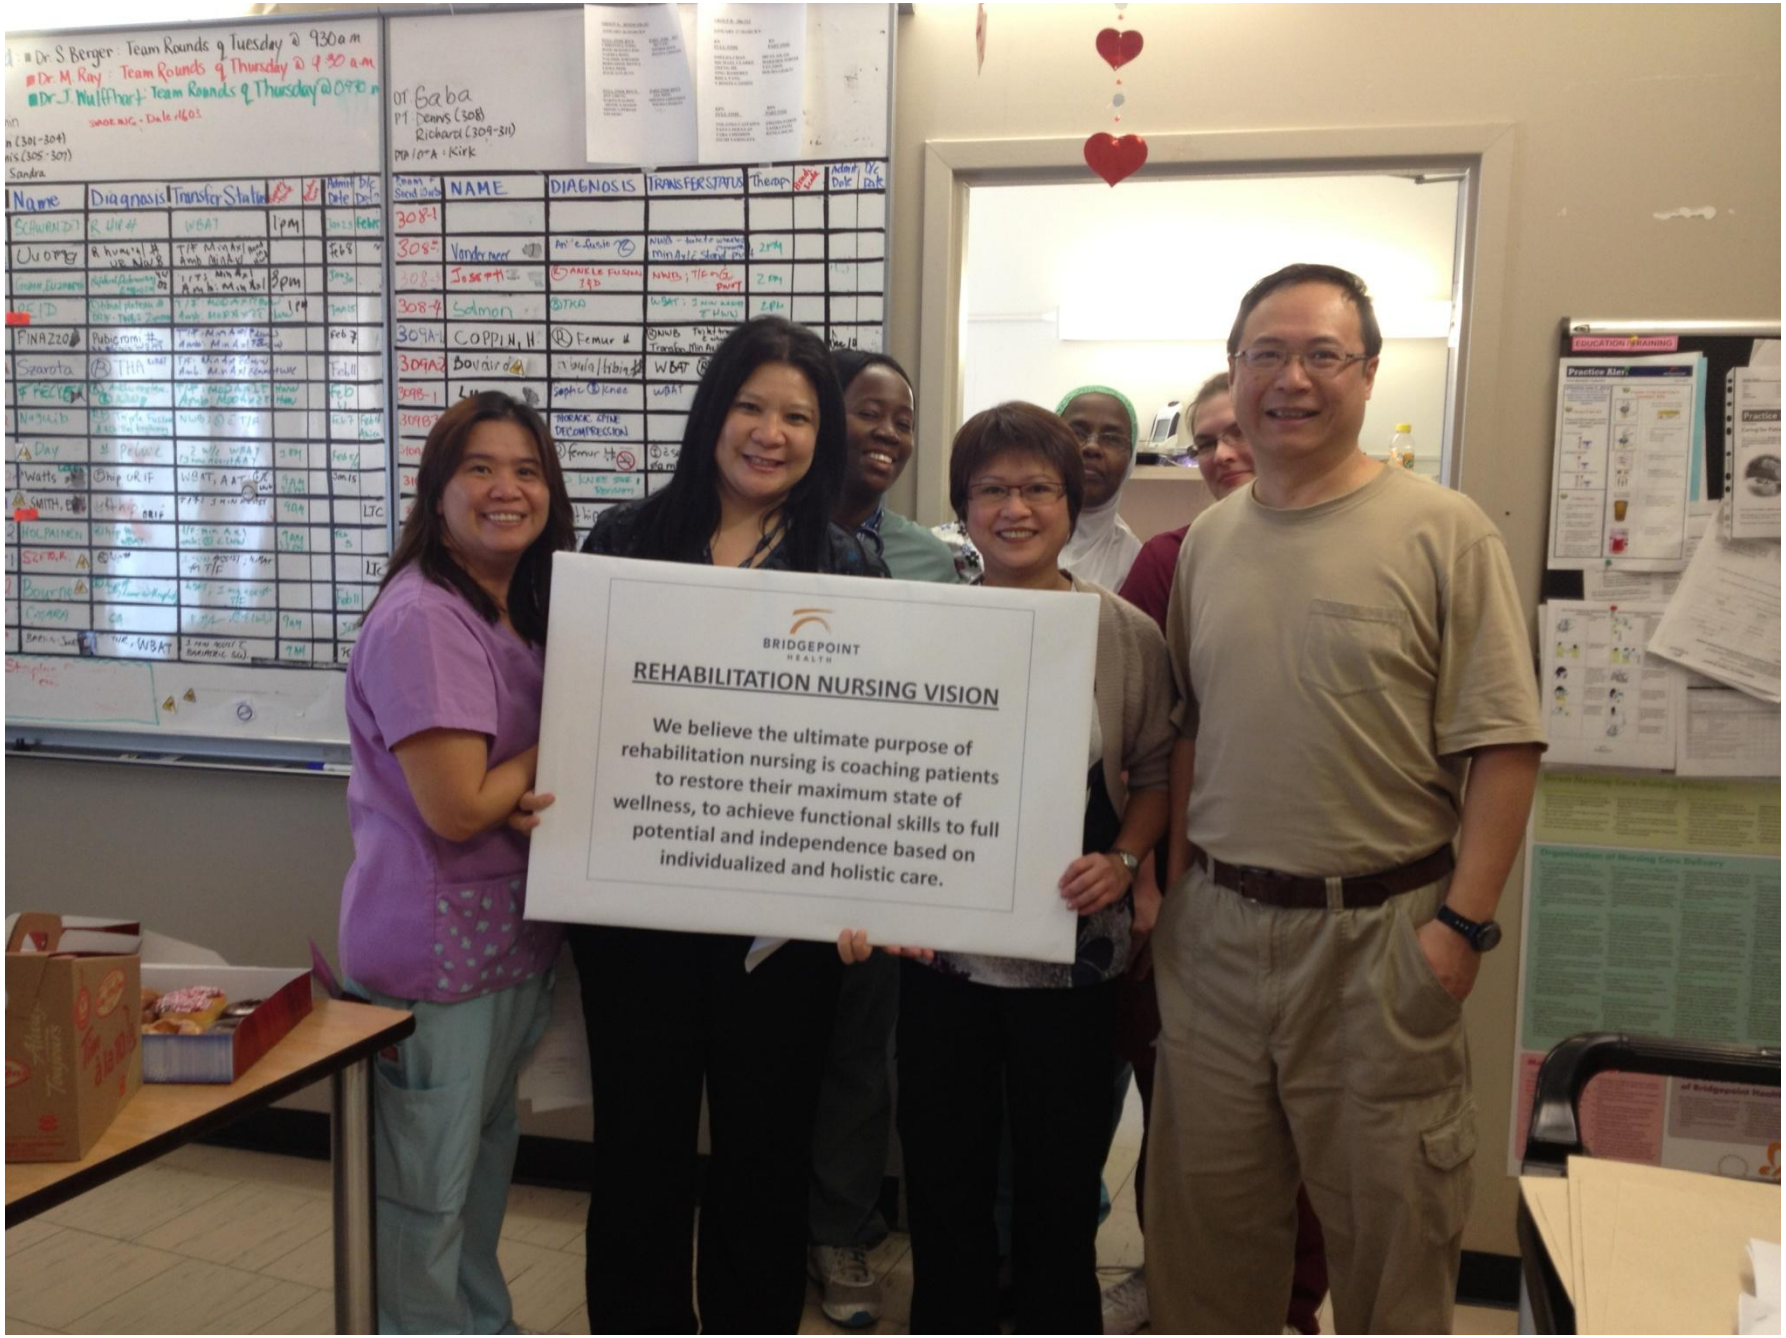
We believe the ultimate purpose of rehabilitation nursing is coaching patients to restore their maximum state of wellness, to achieve functional skills to full potential and independence, based on individualized and holistic care.

We believe the purpose can be achieved by understanding the patient's story, and establishing a personalized holistic plan of care, while preserving their dignity and promoting self esteem 24 hours, 7 days a week.

We believe the factors that help us achieve this purpose are interprofessional collaboration, and patient/ family involvement using evidence informed care.

We believe the factors that hinder us from achieving this purpose are having a healthcare provider centred practice, team functioning and culture issues, limited resources and individual patient limitations.

Rehabilitation Nursing Vision
Launch Day: Feb. 13, 2013



BRIDGEPOINT
HEALTH
REHABILITATION NURSING VISION
We believe the ultimate purpose of rehabilitation nursing is coaching patients to restore their maximum state of wellness, to achieve functional skills to full potential and independence based on individualized and holistic care.

We believe the ultimate purpose of
rehabilitation nursing is coaching patients
to restore their maximum state of
wellness, to achieve functional skills to full
potential and independence

What did we learn?

- Nurses could see their work in their vision
- Creative and Innovative thinking
- Living the vision day to day

fu·tur·al
the future
